

Comprehensive Billing Module

Company: American Healthcare Software Company

Location: USA

Website:

Customer Description

Our customer offers a comprehensive **Healthcare Software Solution** to medium-large size medical practices for managing EMR, document imaging & paperless scheduling.

Business Need

Our client required us to develop a comprehensive billing module which would become the base for their custom Practice Management System

The billing module was required to integrate with their existing EMR platform to pull in the required data so that the visit record for the patient could be billed.

The billing module was required to keep a status of all billed records and allow for payments received to be inputted into billed items.

Solution Offered

We provided our client with the required development assistance. Our experienced developers were able to complete the outlined requirements within the time period allocated and project scope.

Some of the major features we worked on included;

- | A module to manage the billing of patient visits, Charge Management
- | A module to view to status of all billed records
- | A module to enter in received payments for corresponding Charge Records. Payment Management.
- | A module to manage off-site charge management
- | A module to manage Statements, displaying unpaid charges based on aging and other variables. Statements can be printed and sent to the patient
- | A module for re-billing, used if there was an error when the initial charge record was made or not all payments were received
- | Integrated with ICD 9 and CPT codes

Technology Used

- VB .Net
- SQL Server
- Stored Procedure
- ICD, CPT

Benefits to Customer

- | With our years of experience in the Medical software industry, we were able to quickly asses the clients current system and integration requirements
- | Our experience with practice management and billing systems enabled us to understand the complex requirements of the billing modules and effectively develop these into a custom interface for the client..
- | The system we created provided a smooth process for the user to generate charge records, input payments and manage billing status.
- | We provided weekly software updates and held weekly project progress meetings via online conferencing. Ensuring the project was controlled professionally and deadlines were met.
